If the relays are all functioning correctly, then you'll want to check the engine coolant temp sensor, the wiring from the relays to pcm, and the a/c charge level. For an '01 the freon charge should be about 2.2 lbs. Off the top I'd say that your problem sounds a lot like the a/c system needs a recharge.

Chevrolet Impala Questions - problem with cooling fans not ...

Most modern vehicles use electric cooling fans to help pull air through the radiator so that it can keep the engine cool. Most cooling fans use electric motors that have a moderate to high current draw, and as a result are commonly controlled using relays. The cooling fan relay is the relay that controls the engine's cooling fans. When the correct parameters are met, a temperature switch or ...
