This 4G63 Timing Belt job should be performed every 60,000 miles on your turbocharged interference 4G63, and sooner than that if you are racing your vehicle or abusing it. So grab your jackstands and your torque wrench, as we go over our How To Change a 4G63 Timing Belt Guide. Parts you will need to complete this job:

How To Change a 4G63 Timing Belt - My Pro Stret

This write up will show you how to set base ignition timing using an adjustable timing light. This applies to all 1G 4G63 engines INCLUDING non turboed 4G63's, as well as the 97-99 4G63 DSM's. The 95-96 4G63 DSM's DO NOT use a cam angle sensor (CAS) which will not allow you to adjust the base timing.

difficulty setting ignition timing on my 4g64

the timing marks on the 4G63/4G64 are indicated on the gears, there are pointers casted into the timing cover and head, on the slinger washer behind the crank gear that has a half moon cutout. Now when you set the crank timing mark, when you look at the mark on the gear it will be pointing at the casted pointer (or pin) which is about 10 or 11 o clock when looking straight at the front of the engine.

4g64 piston and rings change and timing, power issue ...

But when using the 4G63 cam gears, each cam gear timing mark **MUST** be advanced a half a tooth. You can simply make a new timing mark with white out or a paint pen on each gear to provide a more accurate and visible timing mark. You will also need to use the DOHC 4G64 timing belt, again from the 1994 DOHC 4G64 Galant.
