After listening to the story, The Fly on the Ceiling, draw a simple picture that can be formed with straight lines connecting points on a coordinate grid. Use 8 - 15 points. 2. Record your plotted ordered pairs in the order in which you connected them.

The Fly on the Ceiling - K-5 Math Teaching Resources

What is actually happening here is that as the fly approaches the ceiling, flying normally, it extends its forelegs above its head and grabs the ceiling with its front feet. It then uses its momentum to swing the rest of its body up until all its legs are firmly attached to the ceiling.

How Flies Land on the Ceiling - Today I Found Out

Flies need sticky feet to walk on ceilings, but not so sticky that they get stuck upside down. So each foot comes with a pair of claws that help hoist the gooey foot off the wall. Flies use several...

How Flies Walk on Ceilings | Live Science

This habit carried over into his adult life. He often stayed in bed until almost noon. One day, Descartes noticed a fly on the ceiling while he was laying in bed. He watched it buzz to and fro, to and fro. And, he started to wonder. What if I wanted to share the exact location of the fly on my ceiling with someone else?

Math = Love: Help! My classroom has been taken over by flies!

When sleeping at night, like other insects, flies hang to the ceiling or underneath of leaves until daylight. Flies do not come up until there is a rise in air temperature that makes them to come in full action and activity. Insects can perform if the temperature of air is warm for their metabolism to work precisely.

Why Do Flies Sleep On The Ceiling? - Pest Removal Warrior

René Descartes and the Fly on the Ceiling The coordinate system we commonly use is called the Cartesian system, after the French mathematician René Descartes (1596-1650), who developed it in the 17th century. Legend has it that Descartes, who liked to stay in bed until late, was watching a fly on the ceiling from his bed.
