Comprehensive and informative, Bone Densitometry for Technologists, Second Edition provides all of the practical knowledge needed to expertly and professionally operate any of today's sophisticated densitometry machines.

### Bone Densitometry for Technologists | Sydney Lou Bonnick ...

Your bone density test results are reported in two numbers: T-score and Z-score. T-score. Your T-score is your bone density compared with what is normally expected in a healthy young adult of your sex. Your T-score is the number of units — called standard deviations — that your bone density is above or below the average.

### Bone density test - Mayo Clinic

Quality Bone Densitometry: Performance, Interpretation, and Clinical Application for Technologists The core elements of this program focus on performing quality DXA scans, dissecting the data and applying this knowledge to a technologist's role in patient care.

### Course covering DXA, Bone Densitometry, and Osteoporosis ...

In Bone Densitometry for Technologists, leading densitometry experts Sydney Lou Bonnick, MD, FACP, and Lori Ann Lewis, MRT, CDT, review in simple language all the essentials of densitometry to help practicing radiologic technologists, nurse practitioners, and physician assistants expertly operate any of today's sophisticated densitometry machines.

### Bone Densitometry for Technologists by Sydney Lou Bonnick ...

Bone densitometry is an extraordinary diagnostic tool, and as the technology has matured, the demand for qualified technologists has greatly increased. This book is written for technologists. Densitometry technologists must have a knowledge of skeletal anatomy, densitometry techniques, quality control procedures, pediatric imaging and various disease processes like osteoporosis.

### Bone Densitometry for Technologists | Get Your CEU

The job responsibilities typically required of staff bone densitometry technologists are delineated through a periodic practice analysis. This results in a "task inventory." An advisory committee then determines the number of clinical procedures required to demonstrate adequate candidate experience in performing the tasks on the inventory.
