and delivering business value.

## **NGC: GPU-Optimized Software for DL, ML and HPC Workflows ...**

Cloud computing consists of hardware and software resources made available on the internet as managed external services. These services rely on advanced software applications and high-end networks of server computers. Types of Cloud Computing Service providers create cloud computing systems to serve common business or research needs.

## **What Is Cloud Computing, and How Do You Use It?**

Cloud computing is driven by a network of physical data warehouses hardware, software and services that run on the Internet (the "cloud") instead of on a local device (like your computer). With the cloud, VMware CEO Paul Maritz has said, it's about "how you do computing, not where you do computing."
