Fax modems work by communicating through an audio signal with the modem or fax machine on the other end of the phone line. To a person, the audio signal sounds like a series of high-pitched computer beeps – to the modem, it’s the way of communicating information between the two computers (or the fax machine).

Amazon.com: Customer reviews: Fax, Modem, and Text for IP ...

Usually, a modern fax machine also has a paper-feed mechanism so that it is easy to send multi-page faxes. There is some standard way to encode the white and black spots that the fax machine sees on the paper so that they can travel through a phone line. At the receiving end, there is a mechanism that marks the paper with black dots.
