Apply a 10-step procedure to correctly identify actual casting defects (in samples) and their root causes, and determine appropriate corrective actions and solutions using the AFS-CIATF “International Atlas of Casting Defects” and the three AFS Casting Defects handbooks.

Casting Defect Analysis | American Foundry Society

In Casting Defects Handbook: Aluminum & Aluminum Alloys, many of the common types of casting defects encountered in the production of aluminum alloy castings are presented. These defects are categorized by production method: sand-casting, permanent mold, high pressure diecasting, low pressure, investment, plaster and lost foam, with possible causes and, in some cases, prevention techniques listed.

Casting Defects Handbook: Aluminum ... - ASM International

Casting Shape Defects. Defects in the shape of a casting appear as either mismatches or flash. Shape defects are some of the easiest to fix, since they generally involve readjusting existing molds. Mismatches. Mismatches, also known as shifts, are when different parts of a casting come out misaligned with each other, usually horizontally.

Types of Casting Defects and How to Prevent Them

The International Atlas of Casting Defects handbook divides the defects into seven major categories. The entire defect codes and their names are given in the appendix. New names were added shown in italics.
