Perl has a strong culture of documenting everything, and you are encouraged to get into this habit early on. You'll write your documentation using a format called POD, which is discussed in its own page .

Perl 101 - Documentation

You can embed Pod (Plain Old Text) documentation in your Perl modules and scripts. Following is the rule to use embedded documentation in your Perl Code – Start your documentation with an empty line, a =head1 command at the beginning, and end it with a =cut. Perl will ignore the Pod text you entered in the code.
