Zip-it tool, or if the tool was not able to clear out all debris, another option is to remove the pop-up and clean it out. Most pop-ups are held in place with a nut attached to the drain just under the sink. To remove the pop-up reach behind the drain pipe under the sink to find the pop-up nut.

Five Ways to Fix a Slow Sink Drain - The Spruce

File Type PDF Slow Drain Device Detection

One natural solution that will get some slow drains unclogged is boiling water. If the water is still standing in your shower, let it drain out. Boil some water, and then slowly pour it down the drain, which will help move some minor blockages along. If you have regular PVC pipes, boiling water could damage the pipes.
