TI-89 Titanium This versatile graphing calculator features advanced functionality and 3D graphing that makes problem-solving for AP <sup>®</sup>, advanced mathematics and engineering courses easier. Built-in Computer Algebra System (CAS) allows you to explore and manipulate mathematical expressions in symbolic form.

### **TI-89 Titanium Graphing Calculator**

NOTE: The TI-89 allows you to enter upper and lower case letters, but it does not distinguish between them. For instance, VOL, Vol, VOI, vol, voL, and so forth all name the same variable. To type a lower-case letter, press alpha before typing a letter key (note that a lower-case a appears under the entry line).

The TI-89 and the TI-89 Titanium are graphing calculators developed by Texas Instruments (TI). They are differentiated from most other TI graphing calculators by their computer algebra system, which allows symbolic manipulation of algebraic expressions—equations can be solved in terms of variables, whereas the TI-83/84 series can only give a numeric result.
