When Machine Learning Meets Ai

Where Machine Learning Meets Artificial Intelligence. The field of artificial intelligence (AI) is one of the most dynamic and disruptive technological revolutions today. This ever-evolving phenomenon gave birth to machine learning, also popularly referred to as 'Machine Intelligence' or 'Deep Learning'. Machine learning enables machines to learn how to perform tasks without any programming.

Is Machine Learning Really AI? - Forbes

Autonomous functions for robots, such as spontaneity, are highly sought after. Many control mechanisms for autonomous robots are inspired by the functions of animals, including humans. Roboticists often design robot behaviors using predefined modules and control methodologies, which makes them task-specific, limiting their flexibility. Researchers offer an alternative machine learning-based ...
