There are other reasons publishers may choose to make a book free, such as for a promotion or because the author/publisher just wants to get the information in front of an audience. Here's how to find free books (both public domain and otherwise) through Google Books.

When Skeptics Ask A Handbook

The Greek word *skepsis* means investigation. By calling themselves skeptics, the ancient skeptics thus describe themselves as investigators. They also call themselves 'those who suspend' (*ephektikoi*), thereby signaling that their investigations lead them to suspension of judgment. They do not put forward theories, and they do not deny that knowledge can be found.

Ancient Skepticism (Stanford Encyclopedia of Philosophy)

We call the principle "Mere Lemmas" because the idea behind it is that if a proposition is a mere lemma, in the sense that it derives all of its justification from some prior evidence *e*, then it doesn't have justificatory powers of its own, independent of the justificatory powers of *e*. Suppose, for instance, that you start out by knowing that Jim has a pet, but you don't know what kind ...

Welcome to the provider portion of this handbook. Whether this is your first step in considering the implementation of peer roles in your organization, or you're looking for ideas on how to further improve and grow what you've already developed, you will find many great resources herein.

The Provider's Handbook On Developing & Implementing Peer ...

I was reading through the Player's Handbook today to make a character when I saw the Random Height and Weight tables. Looking at that, I saw that the weight, for a Tiefling, was 110 lbs * (2d4). Surely, I thought, a 220-880 lb tiefling is a little bit much compared to their 4'11" - 6'1" height, so I looked at the others, and they are all similar.

dnd 5e - How do I use the Random Height and Weight table ...

Top Penny Stocks To Buy Right Now Under \$2.50

I have a pandas data frame with few columns. Now I know that certain rows are outliers based on a certain column value. For instance, column 'Vol' has all values around 12xx and one value is 4000 (outlier).. Now I would like to exclude those rows that have Vol column like this.. So, essentially I need to put a filter on the data frame such that we select all rows where the values of a certain ...
