Category:Word processors - Wikipedia

This table gives a comparison of the file formats each word processor can export or save. In some cases, omitting an Export format (Microsoft Word 's omission of WordPerfect export is the best known example) was a sales rather than a technical measure.

Comparison of word processors - Wikipedia

The Amstrad PCW series is a range of personal computers produced by British company Amstrad from 1985 to 1998, and also sold under licence in Europe as the "Joyce" by the German electronics company Schneider in the early years of the series' life. The PCW, short for Personal Computer Word-processor, was targeted at the wordprocessing and home office markets.

Amstrad PCW - Wikipedia

In linguistics, a word of a spoken language can be defined as the smallest sequence of phonemes that can be uttered in isolation with objective or practical meaning. In many languages, words also correspond to sequences of graphemes ("letters") in their standard writing systems that are delimited by spaces wider than the normal inter-letter space, or by other graphical conventions.

Word - Wikipedia

A word processor is software or a device that allows users to create, edit, and print documents. It enables you to write text, store it electronically, display it on a screen, modify it by entering commands and characters from the keyboard, and print it. Of all computer applications, word processing is the most common.
